

Indigenous Plant Use Forum (IPUF) 2023, 25th year
Nombolo Mdhluli Conference Centre, Skukuza, Kruger National Park
27 -31 August.

Ms Karen Swanepoel, Executive director of SAEOPA

1. Purpose and objectives

The theme was “Are we maximising the potential benefits of a rich endemic flora and associated indigenous knowledge?”

An oral presentation was given on the importance of ISO standards submitted for essential and vegetable seed oils in South Africa.

Networking with fellow researchers and students

This was done on 28th August during Session 3 – Commercialisation & Standardization.

2. Background and achievements

The event is characterized by presentations and posters of researchers from South Africa, sharing research on indigenous plants. It is an annual event and is attended by students, lecturers and role players in the private sector involved in active ingredients, application and communities utilising indigenous plants. SAEOPA has been part of the presenters since the year 2000 doing presentations and sharing in the communication of latest research.

4 speakers of previous SAEOPA conferences were present at IPUF. It was good to keep contact and strengthen the good relationships for future conferences and events.

The executive director for SAEOPA is also a regular adjudicator at the events for either posters or oral presentations done by students for the annual IPUF award. During 2023 event, KM Swanepoel was once again evaluating 30 posters of the students from different universities.

The database of role players in the industry was increased and is very valuable. It was attended by 200 delegates.

There were two workshops held and attended during the event in which SAEOPA was represented and participated.

Workshop 1: Ethnobotanical Methodology

Workshop 2: Commercialisation of medicinal plants

Prof Baser from Turkey during the game drive

Papers with Species of interest for essential and vegetable oil producers:

Gaseous exchange and water use efficiency of *Moringa oleifera* grown in different locations of South Africa

Kagisho Murwa

Marula seed performance in response to imbibition and fertilisers
Rendani NemaKanga

Importance of ISO standards for essential and vegetable oils of South Africa
Karen Swanepoel

Quality of the essential oil from *Pelargonium graveolens* cultivated in different locations in the Eastern Cape
Bulelwa Ngcangatha-Maqhude

Moringa leaf extract as a natural biostimulant on different potato (*Solanum tuberosum*) cultivars
Tlangelani Nghondzweni

Effects of different concentrations of Phytostim® biostimulant application on growth and yield of tomato
Mpho Lucious Mokwena

Methodology and ethics of ethnobotany: working with indigenous knowledge holders
Peter Tshisikhawe

Medicinal plants of Lesotho: A review of ethnobotanical, pharmacological and conservation studies
Lerato Seleteng-Kose

A quantitative survey of medicinal plants found in Bapedi home gardens at *Ga-Maponto* village, Capricorn District, Limpopo Province, South Africa e.g., *Adansonia digitata* and *Moringa oleifera*
Khathutshelo Magwede

An insight into the inventory of medicinal plants prescribed by Indigenous knowledge holders in Mahikeng Local Municipality, South Africa e.g., *Helichrysum paronychioides* DC.,
John Asong

An analysis of the South African Vatsonga medicinal ethnobotany and a cross-cultural comparison with the Pedi, Venda, Swati, and Zulu
Eunezia Siteo

Medicinal and ritual plant-use patterns in Southern Africa
Ancia Cornelius

Utilisation of indigenous plants during and post- Covid-19 era by people of the Vhembe region
Mokgaetji Mokganya

A comparative analysis of the *muthi* plants from Port St Johns and Tsolo, sold at Ntozonke Market, Mthatha, Eastern Cape Province
Sizwe Cawe

Mapping of suitable areas for the distribution and cultivation of *Artemisia afra*
Motiki Mofokeng

Integrating IKS and technology in crop monitoring and prediction phytochemical composition in Moringa
Ashwell Ndhhlala

Plant phenology and bioactivity e.g. , *Helichrysum odoratissimum*
Riana Kleynhans

Characterization of *Sclerocarya birrea* (marula) seed oil and investigation of the geographical origin by applying similarity calculations, differential NMR and hierarchical cluster analysis
Wilma Augustyn

Chemical characterisation of selected indigenous seed and nut oils e.g, *Sclerocarya birrea* (Marula), *Trichilia emetica* (Natal mahogany), *Trichilia dregeana* (forest mahogany), *Sterculia murex* (Lowveld chestnut), *Oncoba spinosa* (snuffbox) and *Ximenia caffra* (sourplum).
Karen de Jager

Delving into South African medicinal plant treasures using a biotechnological toolkit
Nox Makunga

Journey with my plants – A 45-year botanical adventure
Denzil Phillips

From compounds to products – lessons learnt on the road to Timbuktu
David Katerere

Turkish Rose Oil – Yesterday and Today
K. Hüsnü Can Başer

The South African medicinal plant research landscape– reflecting on the past 25 years
Alvaro Viljoen

A possible solution to the dilemma, that traditional healers do not have extractants for biologically active compounds in plants, applied to tick control
Kobus Eloff

Phytochemical analysis, antioxidant potential and anti-mycobacterial evaluation of selected medicinal plants traditionally used in Limpopo province e.g., *Rosmarinus officinalis*, *Ximenia caffra*
Potsiso Koma

Influence of seasonal and geographic variation on the chlorogenic acids content of
Helichrysum aureonitens
Wilson Adeosun

The holistic anti-ageing potential of plant extracts used traditionally for skin trouble
Bianca Payne

South African medicinal plants used for the treatment of men's urological, urogenital, and
reproduction health-related conditions
Mompoti Chakale

Developing the Biodiversity Management Plan for *Pelargonium sidoides*
Kate Mole

Inventory of medicinal plants in Africa: a comparative analysis
Sibonelo Mbanjwa

Embedding Social Justice in Ethnobotanical Research
Rachel Wynberg

Application of biochemometrics as a novel approach to identify bioactive molecules in
medicinal plant research
Veronica Maphanga e.g., *Lavandula burnatii*

Utilisation of plants for crop protection in South Africa: an
appraisal of antifungal effect
James L. Mwingaa, e.g. *Lantana camara*, *Moringa oleifera*, *Tagetes minuta*

Insecticidal effects of botanical powders on *Sitophilus zeamais* e.g. *Helichrysum*
odoratissimum, *Lantana camara*,

The next IPUF will be held in the Northern Cape during the last week in August 2024.

Karen Swanepoel suggested a theme of SUSTAINABILITY to be included in future. The annex contains all the abstracts of IPUF 2023
